

## How to Enable/Disable JavaScript

The following describes how to enable JavaScripts in Microsoft Internet Explorer, FireFox and Netscape Navigator browsers.

### Microsoft Internet Explorer 7.x, 6.x, and 5.x

1. Open Internet Explorer.
2. Select *Internet Options* from the *Tools* menu.
3. In *Internet Options* dialog box select the *Security* tab.
4. Click Custom level button at bottom right. The Security settings dialog box will pop up.
5. Under Scripting category check *Active Scripting*, *Allow paste options via script* and *Scripting of Java applets*
6. Check radio boxes.
7. Click *OK* twice to close out.

### Microsoft Internet Explorer 4.x:

1. Select *Internet Options* from the *View* menu
2. click the *Secutity* tab
3. click *Custom*
4. click *Settings*
5. scroll down to locate *Scripting*
6. click *Enable for Active Scripting*
7. click *OK*, then click the *Reload* button

### Microsoft Internet Explorer 3.x:

1. Select *Options* from the *View* menu
2. click *Security*
3. check *Enable Java Programs*
4. Click
5. OK, then click the
6. Reload button

### Firefox Mozilla 1.x and 2.x:

1. Select *Options* from the *Tools* menu
2. click *Content*
3. check *Enable Javascript*
4. Click
5. OK, then click the
6. Reload button

**Netscape 4.0 or higher:**

1. Select *Preferences* from the *Edit* menu
2. click *Advanced*
3. check in both *Enable Java* and *Enable JavaScript*
4. click *OK*
